INTRO

We are a Delhi based structural design and civil engineering consultancy that serves the government, architects, owners, contractors and developers worldwide.

Our Office:- C-35 Pamposh Enclave, Greater Kailash - 1, New Delhi - 110048
Email - vintech@vintechconsultants.com | Website : www.vintechconsultants.com
Contact Us:- 011-43141516, 43141512, 43141521

Our Journey

Our Journey began in 1988 with a one-person operation, and today, after 36+ years in the business, we are one of North India's pioneers in the industry.

Our diverse and extensive expertise allows us to serve a far broader range of clients while also competitive advantage.

We are honored to design projects in sectors like IT parks, airports, shopping malls, religious places, commercial, housing, hospitality, hospitals, office buildings, Convention Halls, Stadium, Industrial Projects and Complexes, totaling over 50 million square feet annually.

Our Director

Dr. Vinod Jain is the Managing Director & founder of Vintech Consultants in 1988, as a young entrepreneur, He was determined to make the venture a success. He has over 35 years of strong commitment of the group to 'excellence'.

If today, the name “VINTECH CONSULTANTS” brings to my mind images of high rise towers, huge commercial, large retail spaces, sky touching hotels, IT Buildings, IT Parks, Commercial Projects, Multiplex / Malls, Airports, Hospitality Projects, Industrial Projects, Educational Projects & Residential Projects. Along with Structural Design in RCC and Steel Structure we are also dealing in Structural Proof Consultancy, Project Management, Tender Document Preparation, Structural Health Feasibility Report and Structural Retrofitting services, Auditorium and many more, growing to be the leading STRUCTURAL DESIGN and PROJECT MANAGEMENT CONSULTANTS, as it is today. As one of the leaders in national capital of our country.

Vintech is accredited to have transformed the skyline. The business has involved rapid with a growth of client base through recommendations as a result of the exceptional level of services offered. Every project is treated with same high level of service and respect, regardless of contract value. He holds a doctorate degree and post graduate degree in structural engineering from IIT Delhi.

Vintech Consultants has been one of the leading structural consultancies in North India. This 35-year-old firm employs a personnel of 100+ people. They have completed 1200+ projects and 400+ multi-story buildings.

Our Steel Projects

BHUTANI GROUP
Cyberthum

LOCATION	Noida
TONNAGE	12500 MT (tallest building - 208 mt)
AREA	50 Lacs Sq. Ft.
ROLE	Structural Designing & Fabrication Drawings

The tallest commercial towers of Delhi NCR are equipped with Lower 2 levels having Retail and F&B units. The basements are planned to have parking and services facilities. The structural system for towers is of composite column and steel beam structure

OMAXE Chandni Chowk

The structural system of the building is a combination of composite column, column and shear wall with steel beams. The composite column will comprise high strength steel I section (E450 grade) embedded in concrete. A Reinforced concrete retaining wall and D-wall are provided all around the basement.

LOCATION	Delhi
AREA	12.85 Lac SQ FT
ROLE	Structural Designing, Fabrication Drawings

BHUTANI GROUP Alphathum

Aerial View of Alphathum

LOCATION Noida
TONNAGE 25 Lac SQ FT (tallest building - 113 mt)
ROLE Structural Designing & Fabrication Drawings

The towers are proposed for offices with Lower 2 levels having Retail and F&B units. The basements are planned to have parking and services facilities. The structural system for towers is of composite column and steel beam structure. The project also features the longest swimming pool in the world, which spans three buildings, the longest of its kind.

SHAHPOORJI PALLONJI
**Redevelopment of IECC-
ITPO Convention Hall**
Bharat Mandpam

The New and modern world-class Integrated-Exhibition-cum-Convention-Centre will have a convention centre with 7,700 seats, a 3,000-seat amphitheatre, a business center, two auditoriums and 26 meeting rooms. It will also harbour an in future a high-level hotel.

LOCATION	DELHI
AREA	8 Lac SQ FT
ROLE	Structural Designing

GOVERNMENT OF DELHI

Lok Nayak Hospital

LOCATION Delhi

AREA 11.7 Lac SQ FT | TONNAGE 10,500 MT

ROLE Structural Designing, Fabrication Drawings

The hospital is the tallest hospital building in India, with two buildings of G+22 floor and a capacity of 1570 beds each. The building is a high-grade structural steel building with concrete deck sheet slabs. The building has hollow box columns, which are relatively novel to the Indian construction industry in the government sector.

Due to its Pre-fabricated structural steel advantage, it is a fast moving construction, leading to minimized disruption to the adjoining hospitals and Delhi's fast-moving traffic.

EDIFICE CONSULTANTS

Atal Akshaya Urja Bhawan

The new headquarters for the Union Ministry of New and Renewable Energy (MNRE), is a netpositive energy campus. The structural system for the building is primarily columns/shear walls beam frame structure and has been done to provide clear spaces for auditoriums and open offices. The roof is projected as 12 mtr. cantilever for solar system.

LOCATION	DELHI
AREA	3.48 Lac SQ FT
ROLE	Structural Designing

THE 3C COMPANY

Delhi One

LOCATION	Noida
Area	60 sq. ft.
ROLE	Structural design Consultants

The project comprises nine high-rise towers ranging from 35 to 50 floors, putting substantial vertical and lateral force on the foundation. Due to this factor, pile assisted raft foundations have been provided in all the residential towers to share the building load and result in the most economical foundation system. An 800 mm D-wall also surrounds all the 3 basements to support the deep excavations in a high groundwater area with less setback space. A special insert plate arrangement has been made to connect the D wall to the basement slab to provide permanent support. The 3 residential buildings in this complex have one of India's largest transfer slabs.

GOVERNMENT OF DELHI

Lok Nayak Hospital

LOCATION Delhi
AREA 11.7 Lac SQ FT | TONNAGE 10,500 MT
ROLE Structural Designing, Fabrication Drawings

The hospital is the tallest hospital building in India, with two buildings of G+22 floor and a capacity of 1570 beds each. The building is a high-grade structural steel building with concrete deck sheet slabs. The building has hollow box columns, which are relatively novel to the Indian construction industry in the government sector.

Due to its Pre-fabricated structural steel advantage, it is a fast moving construction, leading to minimized disruption to the adjoining hospitals and Delhi's fast-moving traffic.

Alphathum

LOCATION	Noida
AREA	29.4 Lac SQ FT
ROLE	Structural designing Incorporating Friction dampers

Alphathum is a set of four buildings. The three buildings are connected at the 33rd storey. It also has an infinity pool all along the terrace spanning the 3 buildings. Due to the connection being at the 33rd storey, there is an expectation of significant movement between the buildings at the time of the earthquake. Hence, friction dampers are provided, which restricts the excessive movement and forces of the bridge.

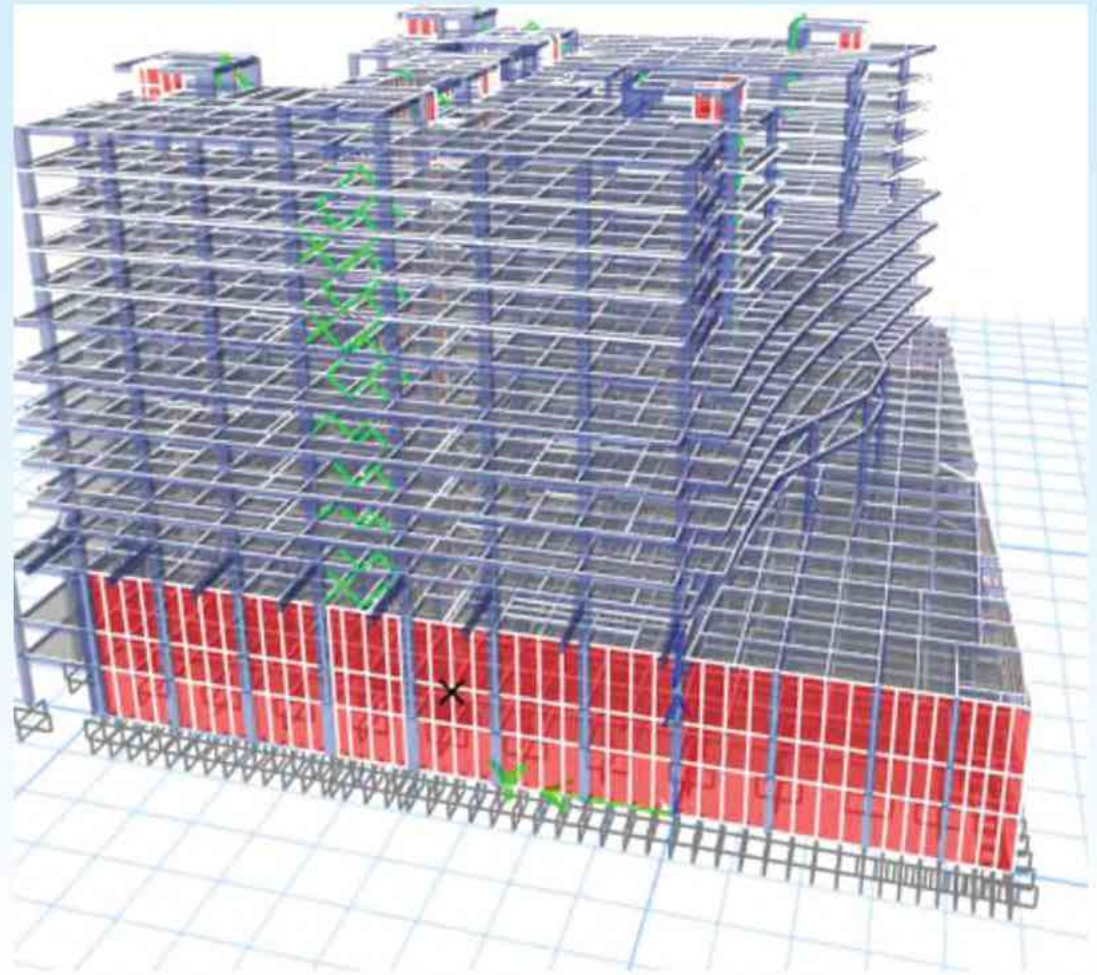

SANT NIRANKARI
CHARITABLE FOUNDATION

Sant Nirankari Mandal Health City

LOCATION Delhi

AREA 10 Lac SQ FT

ROLE Structural designing
Incorporating Friction dampers

Friction dampers have been installed in the philanthropic hospital to improve the building's seismic resistance. Hospitals are critical structures in post-seismic occurrences, and they must remain operational without substantial damage. Dampers in the structure limit peak drifts (movements) and acceleration, making this possible.

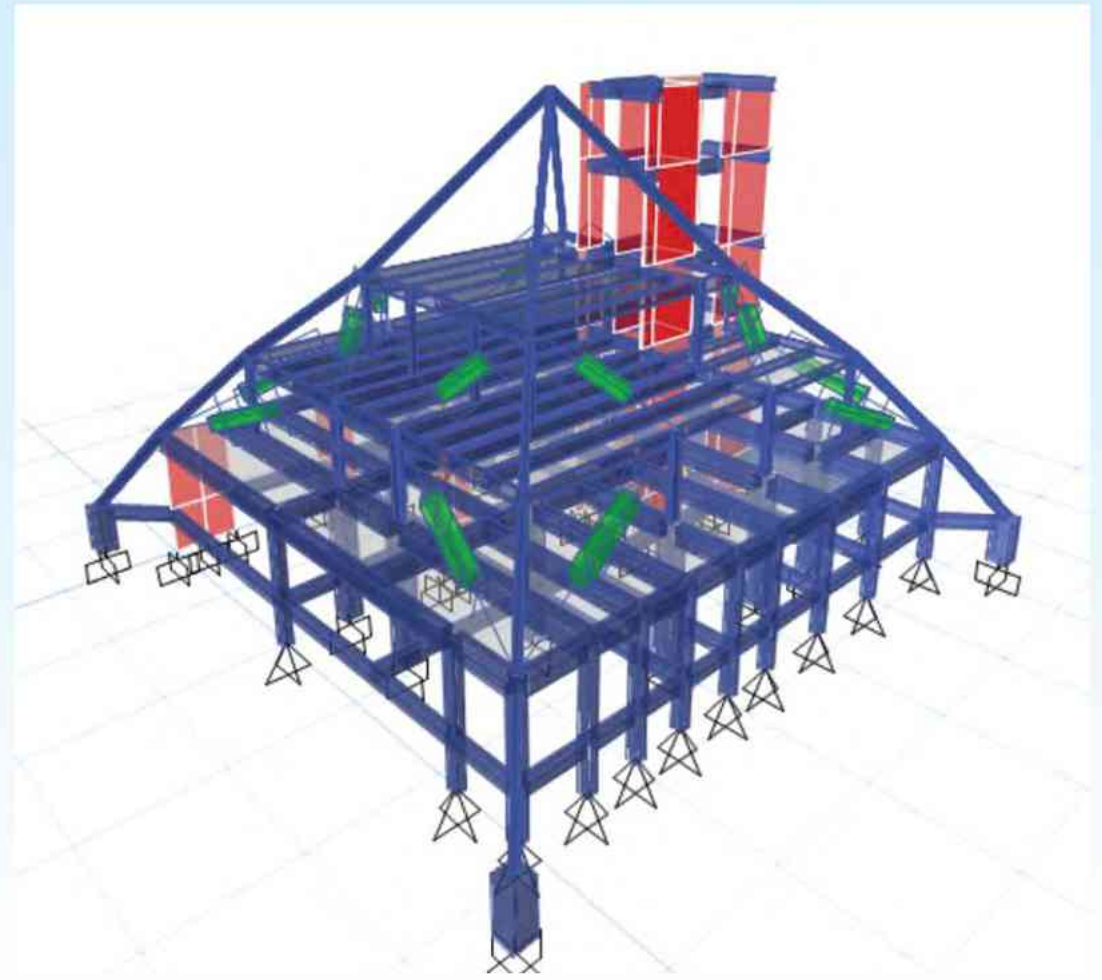

UNION TOURISM MINISTRY

Tourist Facilitation Center, Mantalai

LOCATION Jammu

AREA 1 Lac SQ FT

ROLE Structural designing
Incorporating Friction dampers

The tourist facility comprises typical pyramid-shaped buildings. Jammu is a high seismic zone and because of the peculiar shape of the structure, the structural behaviour is not ideal. With friction brakes, the seismic performance of the buildings is improved exponentially.

Vintech Consultants: Engineering Marvels in Char Dham, Vrindavan

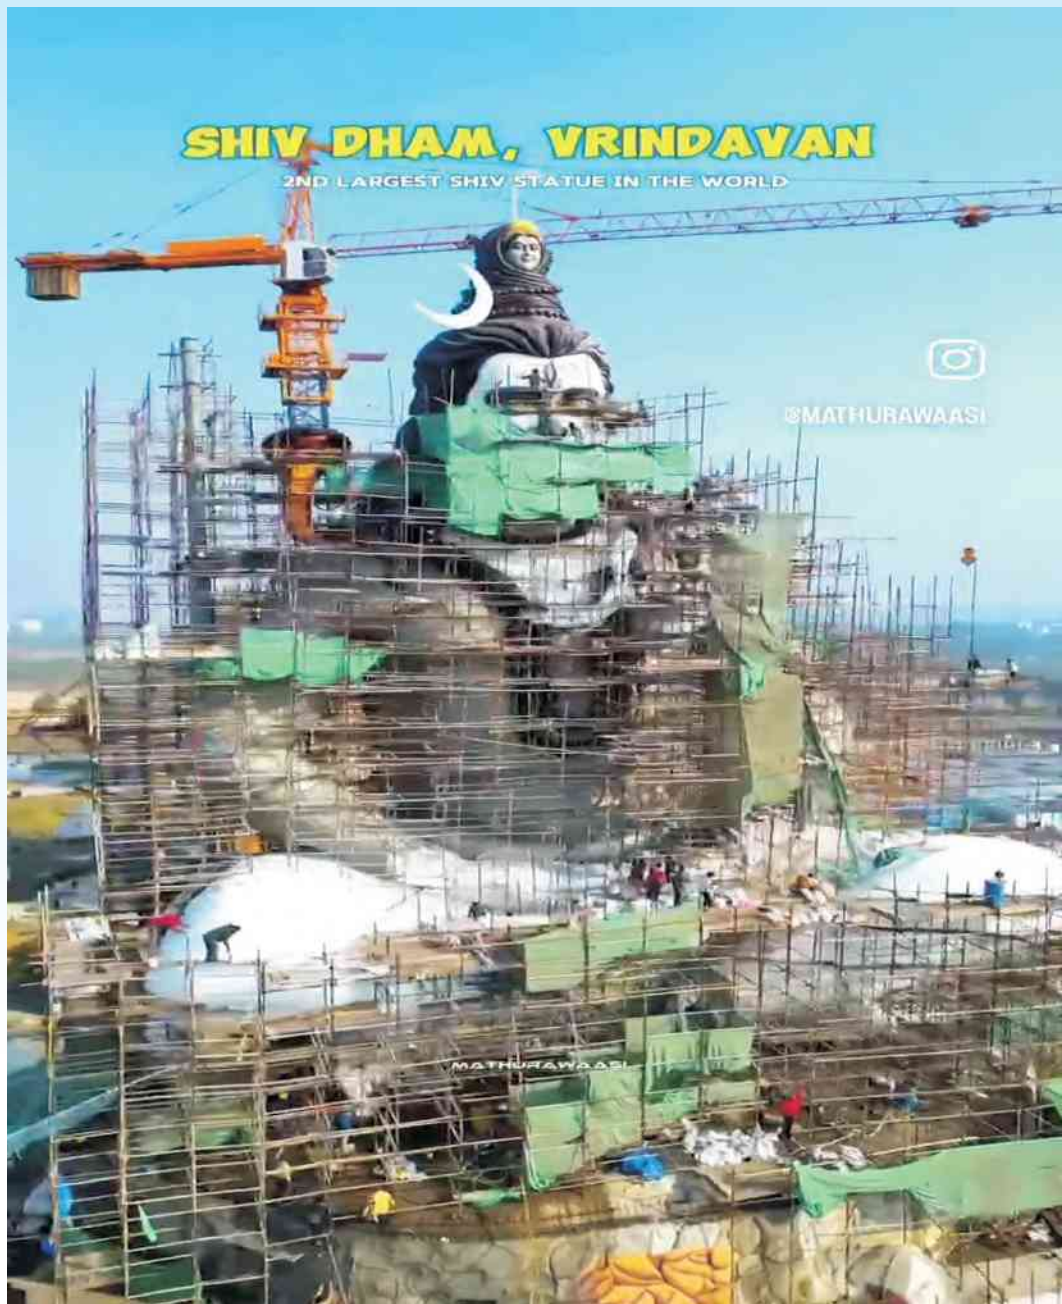

Char Dham, Vrindavan

- Shaping Vrindavan's landscape with iconic structures like the Char Dham Mandir and the world's second-tallest Shiva Murti (187 feet).
 - Creators of the record-breaking 187-meter-tall Shiva statue, recognized by Guinness World Records.
 - Innovative structural design, including a unique integration of a self-standing Trishul holding a 4-metric-ton Damru.
 - Dedicated to pushing engineering boundaries and celebrating India's cultural heritage.
- But that's not all-experience the unparalleled grandeur of the Char Dham Project, featuring Sani Dham, Vaishno Devi Dham (A Limca Book of Records holder!), Shiva Dham, and Krishna Dham.

- A Limca Book of Records holder
- Guinness World Records

During Construction (Shiv Dham)

After Construction (Shiv Dham)
Char Dham, Vrindavan (U.P.)

Pioneering Structural Excellence

Vintech Consultants has played a crucial role in shaping the architectural and spiritual landscape of Vrindavan, Uttar Pradesh. Our team has successfully designed several iconic structures, including the **Char Dham Mandir, the world's second-tallest Shiva Murti (187 feet), the tallest Trident (Trishul), and over 64 intricately designed structures** such as Kaliya Naag, Govardhan Parvat, and key administrative buildings.

Among our most prestigious projects is the **Statue of Spirituality**—a **187-meter-tall masterpiece**, officially recognized by the **Guinness Book of World Records as the tallest Shiva statue in the world**.

But that's not all—experience the unparalleled grandeur of the Char Dham Project, featuring Sani Dham, Vaishno Devi Dham (**A Limca Book of Records holder!**), Shiva Dham, and Krishna Dham.

This landmark achievement reflects our commitment to pushing the boundaries of engineering and architectural excellence.

Innovative Structural Design of Shiva Murti

The towering **Shiva Murti** stands as a testament to cutting-edge engineering and structural ingenuity. Designed with a unique combination of materials, the statue ensures both durability and aesthetic grandeur:

- **Skeleton:** High-strength **structural steel** forms the framework, providing robustness and flexibility against environmental forces.
- **Core & Spine:** **Reinforced concrete shear walls** reinforce the statue's stability, acting as its backbone.
- **Muscles & Exterior:** High-grade **reinforced concrete**, architecturally finished with **fiber-reinforced concrete (FRC)**, enhances the statue's durability while allowing intricate sculptural detailing.

Engineering Challenges & Innovative Solutions

A key structural challenge was the integration of the **self-standing Trishul (Trident)**, which is only connected at **Shiva's shoulder** through a minimal attachment. To add to the complexity, the Trishul was designed to hold a **4-metric-ton (MT) Damroo**, requiring exceptional precision in load balancing and vibration control.

Our contributions to Vrindavan's skyline not only showcase our technical expertise but also reinforce India's rich cultural and architectural heritage.

Retrofitting & Rehabilitation

VINTECH provides retrofitting and rehabilitation design services.

Scope of work

- Complete structural assessment of present condition of structure
- Providing a detailed report with degree of renovation required
- Advising cost-effective solutions for the retrofitting and rehabilitation
- Liaison with the retrofitting execution company and provision of detailed structural drawings for the same

Social Responsibility

ModSkool

ROLE	LOCATION
------	----------

Structural design Consultants	Delhi
----------------------------------	-------

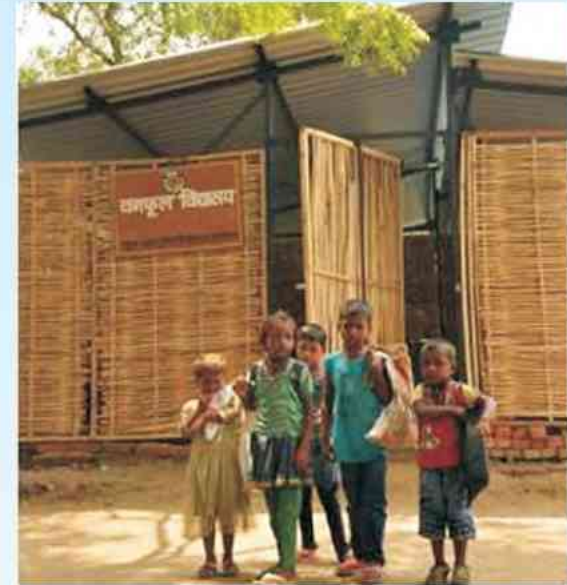

ModSKOOL is the design of a low-cost, modular school for 250 students that can be built in a few hours and dismantled as quickly by the community to protect from government demolitions and annual floods. It is located in Chilla Khadar, a slum on the floodplains of River Yamuna in Delhi, inhabited by a farming community of around 1000 families.

DESIGN & BUILD SCHOOL FOR UNDER-PRIVILEGED CHILDREN IN DELHI

- ✓ Vintech designed a school for under-privileged children living in the slums of Yamuna Khadar in New Delhi.
- ✓ The project was completely sponsored by Vintech as a social initiative to educate. The project was executed jointly with NGO ModSkool.

PROVIDING TRAINING TO FRESHERS

- ✓ We provide internship and training to students from leading colleges of India with accompanied stipend and incentives.
- ✓ The training includes gaining expertise in a structural design program, honing of structural design skills by closely being associated with at least one project and development of excel and similar tools for generation of results.
- ✓ Vintech has so far provided internship opportunities to more than 200+ students and graduates.

PRO-BONO DESIGN FOR RELIGIOUS STRUCTURES

Vintech has designed some temples pro-bono as a service to the society.

The projects are:-

- ✓ Design and execution of Sai Temple extension at Lodhi Road
- ✓ Jain Temple at Tilak Nagar
- ✓ Jaypee Mandir.
- ✓ Sai Temple Jamshedpur.
